

How to know if the fishing is getting worse

Using Fractions

Are there fewer fish over one
foot long?

How to find the answer

IN 5 STEPS

Step 1

Compute the fraction from last year

Step1

25

$$\begin{array}{r} 25 \\ \hline 125 \end{array}$$

Step 2: Reduce the fraction

25 And 125 can each be divided by 25

$$\frac{25}{125} \div 25 = \frac{1}{5}$$

Step 3

Compute the fraction
from this fishing trip

Step 3

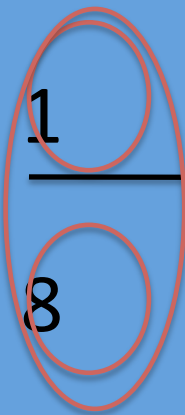

$$\frac{2}{16}$$

2

Step 4: Reduce the fraction

2 and 16 can each be divided by 2

$$\frac{2}{16} \div 2 = \frac{1}{8}$$

Step 5: Compare the two fractions

LAST YEAR	THIS FISHING TRIP
$\frac{1}{5}$ 	$\frac{1}{8}$ 

Still confused?
Think of it as a shape.

$$\frac{1}{5}$$

$$\frac{1}{8}$$
