

Finding the Average

www.7generationgames.com

What is the average?

- Average = Mean
- How to find the Mean
 - Step 1 : Add up all the numbers
 - Step 2: Divide by however numbers you had in the first place

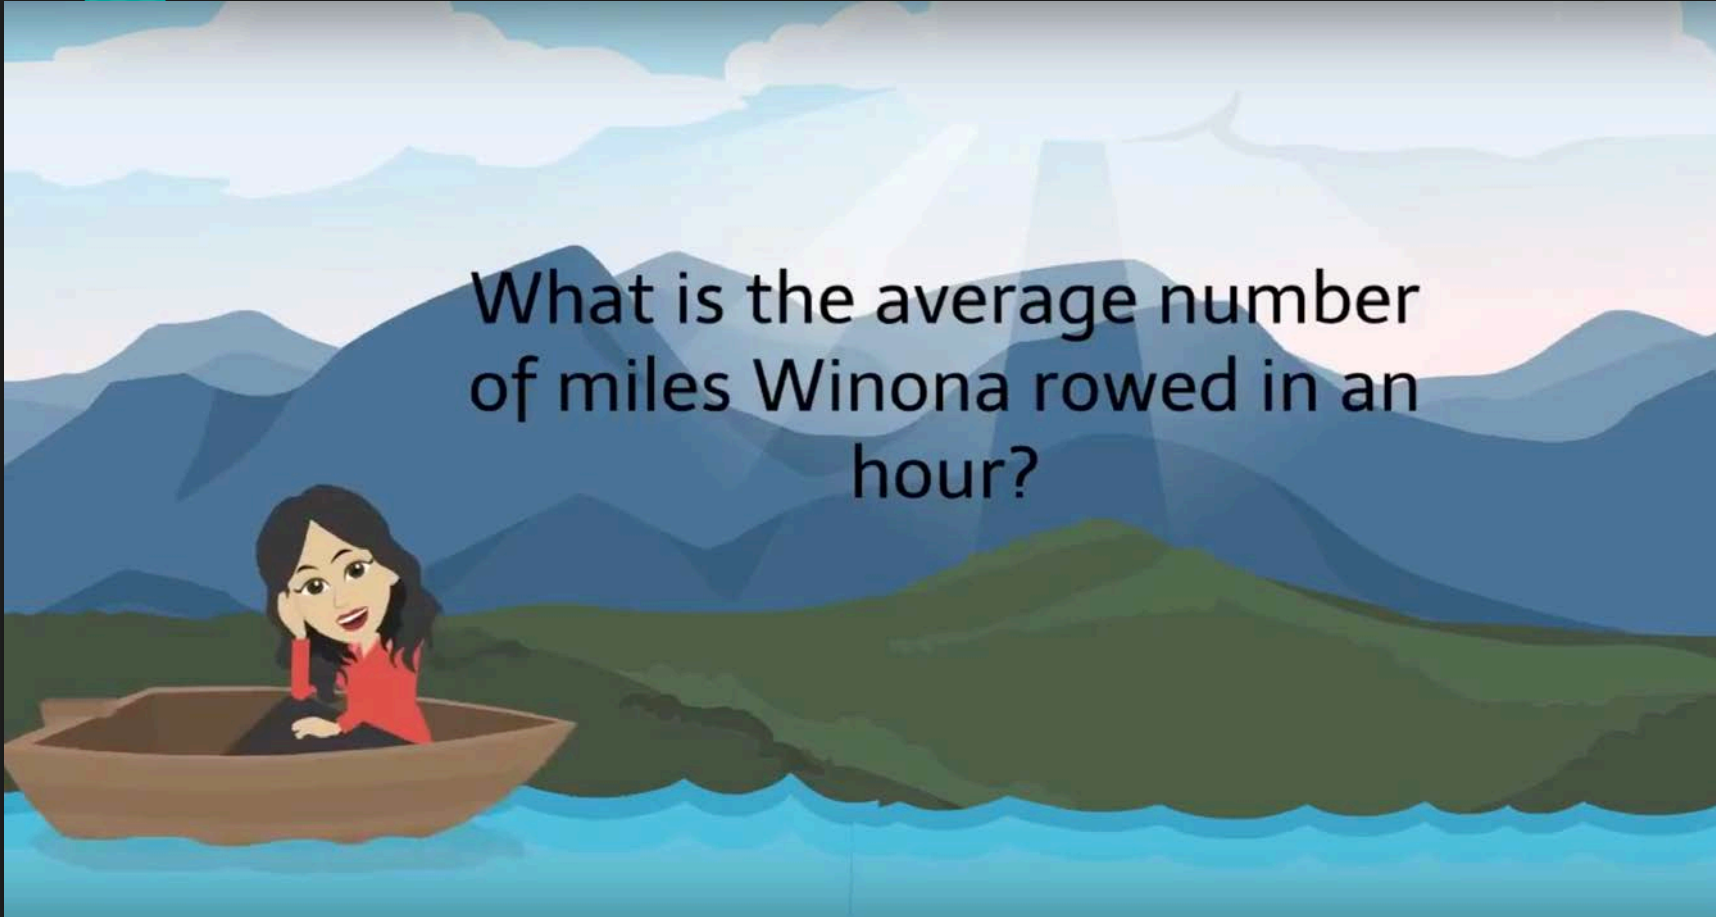

Add Add Add....

- DIVIDE

- That's how you get the
MEAN(average)! !!

Problem 1

What is the average number of miles Winona rowed in an hour?

Hour	Miles Rowed
9:00	2
10:00	3
11:00	3
12:00	4

How many numbers did we add up?

Hour	Miles Rowed
9:00	2
10:00	3
11:00	3
12:00	4
TOTAL	12

Divide the total by N (number of hours)

$$\frac{12 - \text{Total}}{4 - N} = 3$$

Divide the total by N (number of hours)

$$\frac{12 - \text{Total}}{4 - N} = 3$$

THE AVERAGE IS 3!
