

VISUALIZE

What fraction of the fish
are over one foot long ?

125 fish

125 fish is
the whole pile

125 pieces of
stinky, slimy fish

25 of those are
over a foot long

Think of it
like this

125 fish make
up the whole pile

The denominator is the
number of parts in a whole
so the denominator = 125

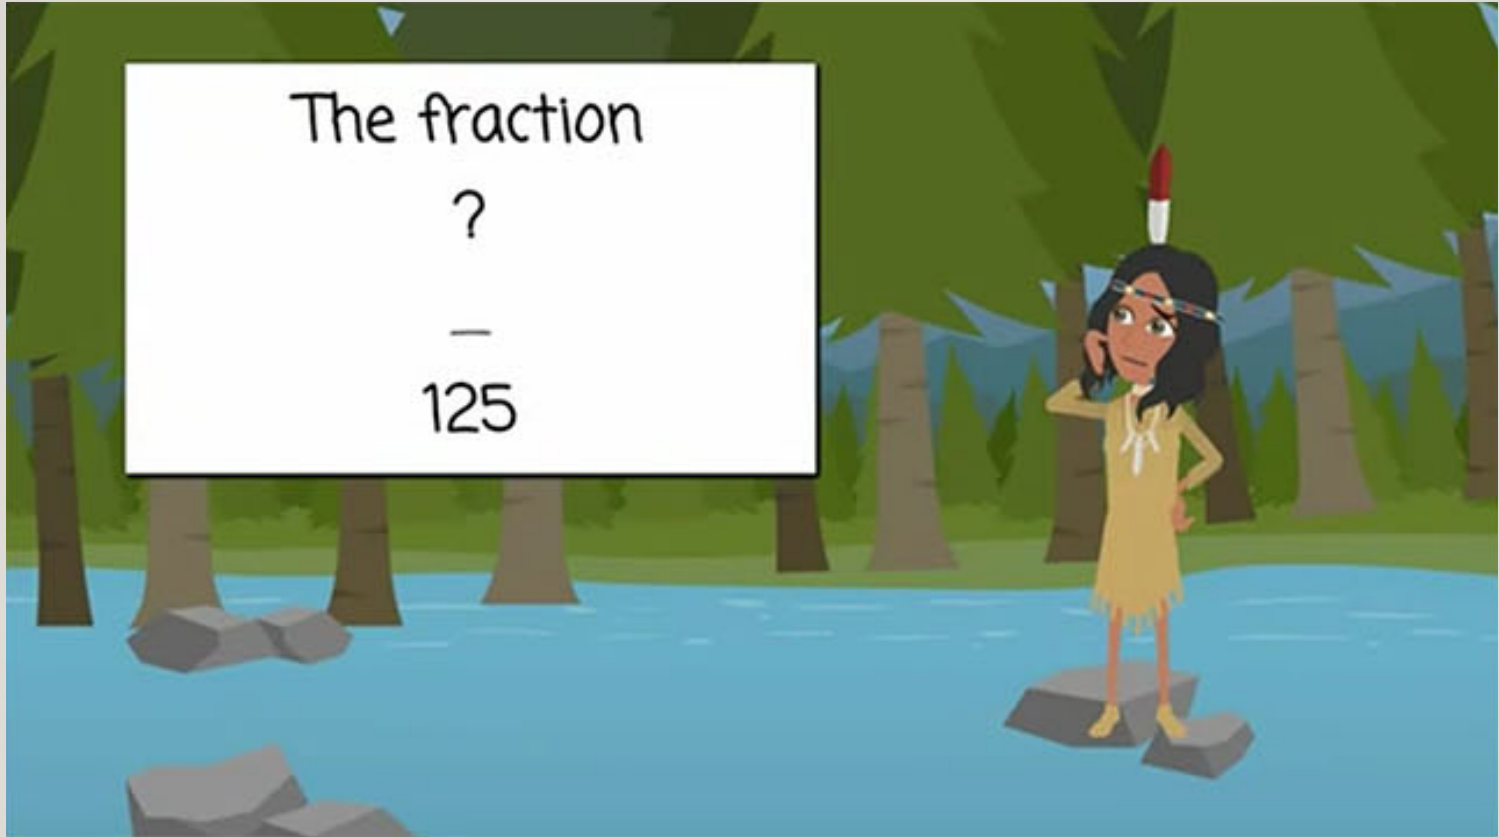

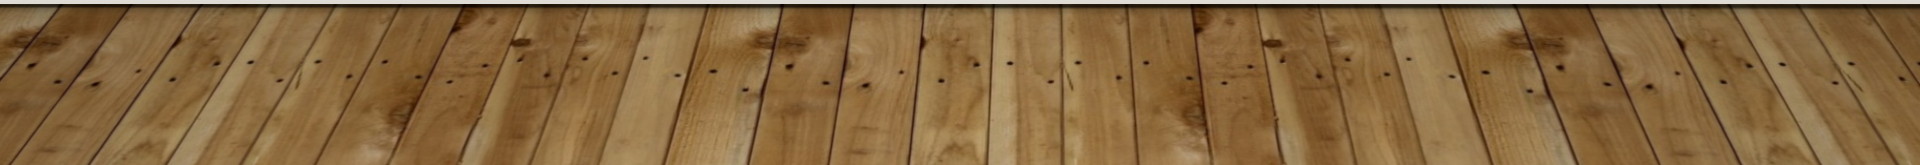

The fraction

?

—

125

The numerator is the
number of parts we
have, so

All those fish over 1 foot long = 25
fishes so, that's the numerator.
Get back in that pile!

The fraction is

25

—

125
