

Graph activity: A note to the teacher

Business card stock may not be the best \$10 I have spent as a teacher, but it's high on the list. I don't know what it is about cards that makes something seem like a game but I have had the greatest success with activities like this one.

First, print out sets of cards. You can decide whether you want to do this as a group activity or an individual one. I've done it with students in groups of two, three and four, as well as working on their own.

Second, print out the graphs page or show it using a smartboard or projector.

Each student / group is required to complete the cards using the graphs provided.

Several cards have open-ended questions, such as "What is one conclusion you can make about this graph?"

After the students have completed the assignment, which should take around 10-15 minutes, have them give their answers to these questions. Discuss the different questions and answers that can come from the same set of data.

Standards addressed in this exercise:

Statistics & Probability: Summarize numerical data sets in relation to their context

Ratios & Proportional Relationships: Identify the constant of proportionality (unit rate) in tables, graphs, equations, diagrams, and verbal descriptions of proportional relationships.

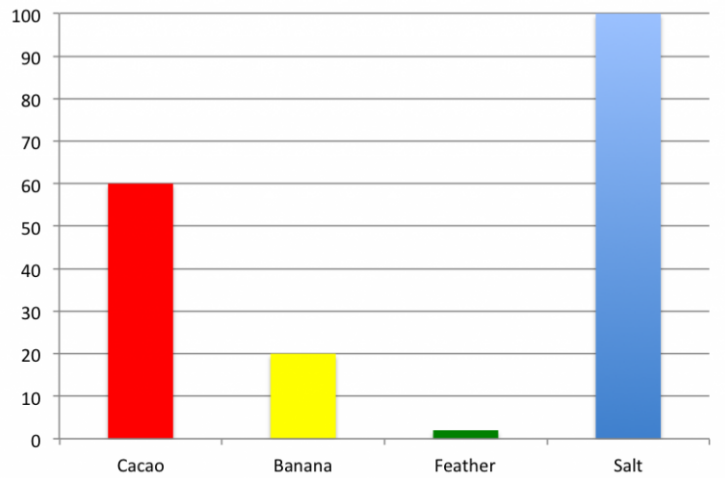

Number of Bananas

Bananas Found

of Each Item Found in the Forest

Graph : Bananas Found

The MODE for number of bananas found was

_____.

Graph : Bananas Found

One conclusion you can make

about this graph is _____

_____.

Graph: Number of Bananas

The RANGE for number of bananas found on any one day was

Graph: Number of Bananas

One conclusion you can make about this graph is

_____.

Graph: Food

The ratio of cake to doughnuts sold was

_____ to _____.

Graph: Food

How many more people bought doughnuts than cake?

Graph: Items in Forest

Cacao beans are found

_____ times as often as bananas.

Graph: Items in Forest

One conclusion you can make about this graph

is _____

_____.

BONUS QUESTION!

Compare two graphs.

Graph 1 _____

Graph 2 _____

We can see this information from graph 1 _____

but this information from

graph 2 _____
