# BUG

- A problem in the game that prevents the game from running the way it is supposed to run.
  - The bug could be a problem in the code, a missing asset or any number of issues that negatively impact the software from running correctly.

# ENHANCEMENT

- An improvement made to a game. An enhancement is different from a bug in that it does fix something that is broken, but improves the game by adding a new element or building upon an existing part of the game.

# ENHANCEMENT

- An enhancement is a very specific improvement to an existing element of a game.

- An idea for a totally new element would fall under creative development.

# USING BUGZILLA

- Bugzilla is a software to record bugs and enhancements.
